Great Basin Priority Summary - Based on Most Recent 209's 9/14/2020

[illegible]

Evening Brief

Date: Monday September 14th, 2020

Weather Summary

***** Warm and dry with Strong Winds returning Thursday/Friday *****

High pressure will continue to dominate the Great Basin for warm temperatures, generally light winds and sunny skies, with the exception of areas that are seeing blankets of smoke in ID/NV through Wednesday. The airmass will also be quite dry with minimum humidity in the single digits to low teens over Nevada/Idaho and low teens in Utah, along with poor to moderate overnight RH recovery through mid-week.

Wind speeds pick up on Thursday ahead of the low that finally moves inland over northern CA and the Pac NW. These winds will be stronger with southwest gusts 35-45 mph and continued single digit to low teen RH. Cooler temperatures will move in with some light precipitation likely over central Idaho/northeast NV and northern Utah for Friday and Saturday. Dry air returns by Sunday.

Preparedness Levels & Great Basin Fire Activity (from WFDSS)

Great Basin	PL 3	Light Initial Attack Activity
National	PL 5	New Fires and Acres: 7 new fires for 543.1 acres. 49,767 Large Fire Acres.

Fuels/Fire Potential

*****A Fuel and Fire Behavior Advisory is in Effect for S. Idaho, Eastern Nevada, Most of Utah and the Western Arizona Strip *****

Fire Danger is increasing region wide under this warm and dry airmass. ERCs are much above normal for the time of year across all but far eastern Utah. All fuels remain receptive to fire and may exhibit advance fire behavior even in the absence of wind. The low pressure moving into the region Friday/Saturday will decrease fire danger temporarily with light precipitation and higher RHs, especially across central Idaho and northeast Utah. This decrease will be temporary however as warm and dry weather returns by early next week.

Resources:

Aviation within the Great Basin

- 1 VLAT, 9 LATs (1 O/S), 0 CL-415
- 23 SEATs, 1 FB, 13 AA, 1 ASM, 1 LP
- 9 Type 1 Helicopters / 9 Comm.
